

“Among us” Social Event:

Playing Among us: The LOC invites you to join us for a friendly evening of online games playing the best multiplayer game of 2020. Do your tasks, find the impostors, or trick your teammates (don't be sus) participating in this social event on Wednesday 15th September at 6pm. The best way to know your colleagues (in this post-pandemic world) is by playing video games.

To play with us you have several options as these games are in several platforms:

- Playing the game from Steam/Epic Store: If you have a steam account (or Epic games) and a copy of the game you are all set (The game runs only on windows and Mac). If you don't have any of these platforms, download Steam: <https://store.steampowered.com/about/>
- If you don't have a copy of the game in steam or another platform, you can download the phone app “Among us” (free cost) from the Android play store or the iOS app store.
- If you still want to play on your laptop but you don't own a copy of the game, let us know and we can sort things out.
- If you only have Linux in your laptop we strongly recommend you using the phone app, unless you already can run windows or android in your laptop.

We are going to use Zoom to communicate during the event, but if anyone wants to host on Discord, this is more than welcome (Let us know in advance). We are probably going to ask some of you to host some of the games as we are a lot of People, if you want to volunteer to do this, write to us.

More information during the summer school!
