Speaker: Jonathan Frawley

Title: Introduction to Machine Learning with PyTorch

Description:

This course will introduce you to key machine learning concepts and show how machine learning can be used to solve real problems. This session will be a mix of theory and practical examples which use the Python programming language and the PyTorch framework. At the end of the session you will be able to run and modify a machine learning model.

Background material (optional):

 - Course notes are available online: https://jonathanfrawley.com/machine_learning_course/

 - PyTorch with examples: https://pytorch.org/tutorials/beginner/pytorch_with_examples.html

 - PyTorch 60 minutes material: https://pytorch.org/tutorials/beginner/deep_learning_60min_blitz.html
