

HOW TO FIND WHERE TO PUT YOUR POSTER ?

- (1) Check on the NAM website (<https://conference.astro.dur.ac.uk/event/7/program>) which category your session is part of (Cosmo & LSS, Instrumentation, High Energy, ...)
- (2) Check on the 3 maps hereafter on which floor (F0 or F2)/poster area (1 or 2) poster boards (PBs) of your session are located.
- (3) Looking at the maps, check which side of the PBs (a or b), your poster should be hanged.
- (4) Hang your poster on the given PB side, a or b.
- (5) Your poster should be **A1 landscape**, and each board will accommodate **2 posters** (one above the other). You are free to hang your poster anywhere within your session's attributed PB(s).

Some notes :

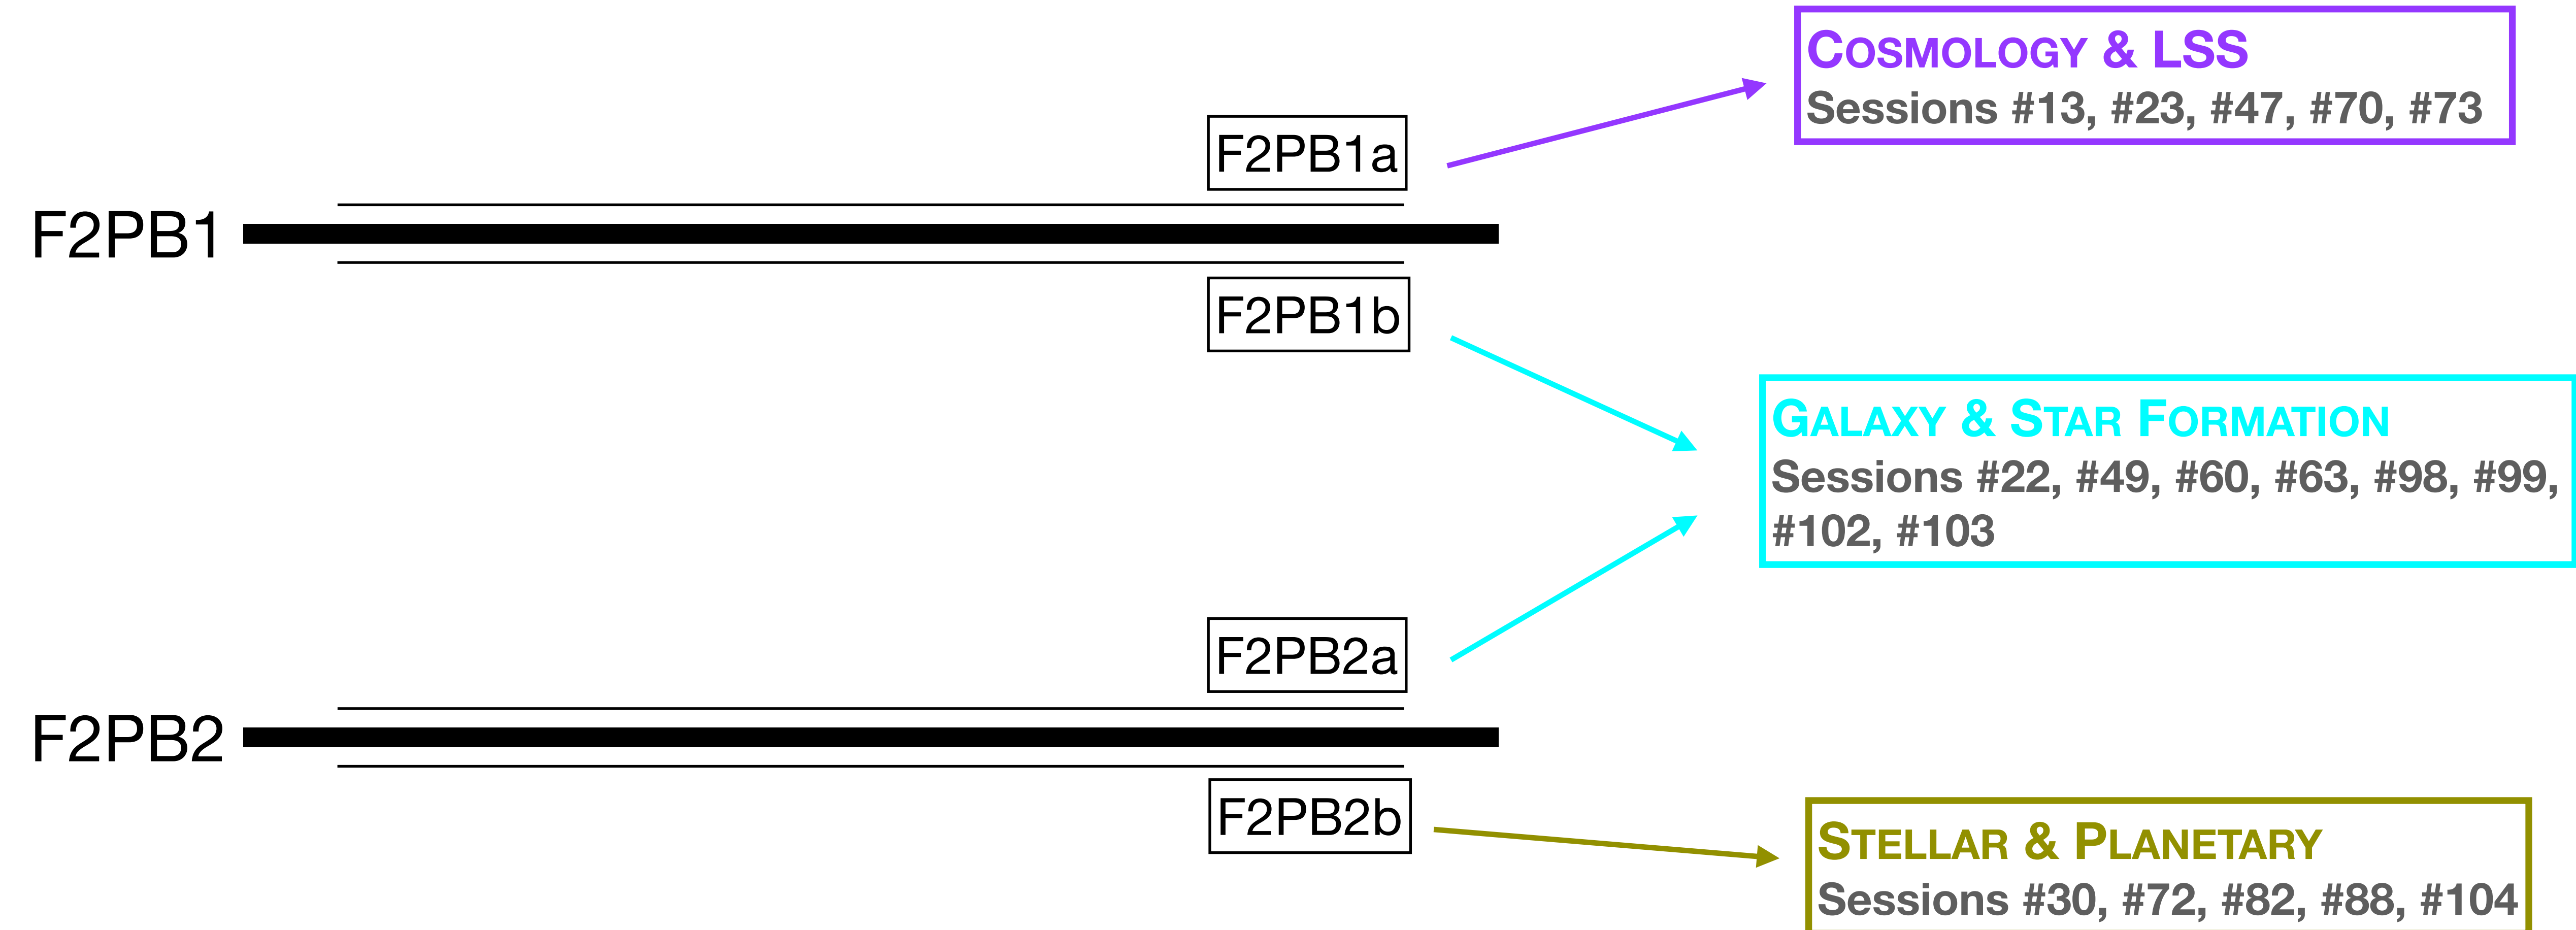

- Each poster should be on FxPBya/b, where x is the floor number, y is the PB number on the given floor, a/b are the two sides of PBy.
- The same color code for Categories as in the Block schedule was kept (<https://conference.astro.dur.ac.uk/event/7/attachments/32/113/NAM%202025%20Schedule%20-%20June%206th.pdf>)
- All sessions' numbers are given for each category in the maps.
