

National Astronomy Meeting (NAM) 2025

Friday 11 July 2025

The UK White Dwarf Community: An Opportunity to Connect (14:15 - 15:45)

time	[id] title	presenter
14:15	Prep time	
14:20	[429] Characterisation of a white dwarf with transiting debris in the habitable zone	
14:30	[332] Uncovering hidden white dwarf binary populations using Gaia and Galex	GARBUTT, James
14:40	[134] A different perspective: how the choice of disc model affects the interpretation of polluted white dwarfs	
14:50	[984] White dwarfs in DESI DR1	
15:00	[498] Overly Luminous Type Ia Supernovae from Super-Chandrasekhar Mass Highly Magnetised White Dwarfs	HACKETT, Alexander
15:10	[635] The discovery of new eclipsing white dwarf binary systems from NGTS	
15:20	[584] Investigating the origin of the lowest-mass white dwarf stars	
15:30	[941] Long term spectral monitoring of a small sample of white dwarfs
